

RB TUBE CUTTERS

SO LIGHT! SO EASY TO USE! – REX ADVANCED ROLLER SYSTEM

Light, precise cutting of thin wall stainless steel (INOX) pipe attracts the piping world's attention.

RB TUBE CUTTER

Φ3–Φ67

Ball bearings make the difference! Great cuts with the greatest of ease!

High-quality radial ball bearings enable REX RB tube cutters to cut with less effort than any previous models. Give them a try and see just how easy it is! Replace the blade with an SUS pipe blade and they can even cut thin wall stainless steel pipes.
* SUS pipe replacement blades for Models 30, 42 and 67 sold separately.

RB TUBE CUTTERS

Functions

Designed to produce the finest cut possible!

REX RB Tube cutters offer a whole new level of performance. Rotating more easily than any cutter before, they make cutting a dream!

Use less energy than ever!

Physical strength is no longer a requirement for efficient cutting, so just about anyone can use them.

Five sizes, 12 models to suit practically any job

REX offers you a choice of 12 models for pipes ranging from 3 mm to 67 mm in diameter.

Performance

High-performance bearings

High-performance bearings are used in both the roller and blade, so the cutter turns easily with only slight force even with the cutting load applied.

Ideal for copper or thin wall stainless steel pipes

Replacing the blade allows you to use the cutter for cutting thin-walled stainless steel pipes and, in the case of the Model N67PE, polyethylene (PE) pipes. (Replacement blades sold separately)

Improved cutting performance

The use of ball bearings not only reduces cutting resistance but also dramatically improves cutting accuracy, the most important factor determining the quality of the finished cut.

Design

Reflecting REX' commitment to top performance

These new cutters are the embodiment of REX' commitment to making user-friendly tools with a revolutionary new design, determined by analysing work tasks ergonomically. The cutters are designed to fit the hand perfectly, making it easy to use and preventing fatigue even when used repeatedly.

Ergonomic design Fig 3

Ease of use

Universal design makes them easy for anyone to use

This range of cutters requires only half the cutting force of previous models and can be used to cut even short pipes that cannot be cut with conventional pipe cutters. The new range enables even inexperienced operators and those without great physical strength to make perfect cuts with minimum effort.
